Earth Sticks and Operating Poles Top Section with Bayonet Adapter

Our operating poles are made from durable, non-conductive PVC or Fibreglass material.

We ensure that they can withstand the mechanical stress and environmental conditions you are likely to encounter.

We make sure they are properly sealed so that they are moisture resistant. Our operating poles are light for easy transportation and handling. We also customise labelling to help ensure safe operation..

Drawing No Top section with bayonet adapter 331511

Product No Top section with bayonet adapter FC-P331511

- Made from foam filled Fibreglass or PVC
- We use more economical PVC for shorter lengths (1.2m or less) and stronger Fibreglass for longer lengths
- Button joints enable easy assembly and disassembly
- Can be made to custom lengths
- Fibreglass OD 32mm maximum recommended length is 2.4m
- Fibreglass OD 40mm, standard lengths are 2m and 3m
- Tested to 100kV/300mm for 1 minute
- All sections tested to IEC 60855
